Transcending of Vice and Virtues as the Supreme Wisdom Dawns

One is completely isolated from the agency of doing and doership as soon as the epiphany of identification with one's essential nature occurs. This transition of identification is concomitant with the intuitive insight into one's Shiva-hood. The conventional reason is tainted by the conditioning of ideation, imagery, objective and subjective perception and the perception itself. The ultimate transcendental wisdom that is the substratum of both divergent as well convergent mind sets and is seated in the spiritual space which, owing to its all pervasiveness has no other resort. This supreme awareness is not conditioned in any fixed order or creation, sustenance, dissolution veiling or redemption. Any function can follow or proceed another arbitrarily.

Such state has been attained by the hoary preceptors. The mode of induction of this wisdom is special. It dawns as a pure subjective awareness. A result of the process of "not doing anything" (अकरणवृत्ति) by shining both rejection as well assertion by adhering to an incessant and perpetuated mind set i.e. *Achyut vritti*, the ultimate consciousness. This leads to a state that is beyond the doership and fruition of both types of karmas- good or bad ."

Discarding all choices or त्यागस्वीकार परिहार: culminates into an incessant current of consciousness . Unswerving or *Achyut* can be defined in terms of eternal since eternity cannot be punctuated by gaps of transitoriness.

मत्वेति हेलया किंचित् माँ गृहाणविमुंचमा

Astavakra instructs his monarch disciple "having confirmed thus don't reject or assert anything" . This is an often repeated knacks in the tantras "a concomitant rejection of all choices." The term हेल्या or sporting signifies both denial and acceptance of the objective phenomena as a portion of the phenomena itself so the ultimate mutual denial is only sporting and not an

actual or intellectual phenomena involving reasoning or discriminatory wisdom . There are two views regarding the phenomena of transcendence of vice and virtues by a man of enlightenment. Some opine that they are annulled and never fructify

अनिष्टमिष्टमिश्रंचत्रिविधंकर्मणांफलं भवत्यत्यागिनांप्रेत्य नतु संन्यासिनां

क्वचित्

The three types of identification of karmas i.e. Good ,bad and mixed pertains to commoners and not renouncers. But this has been mentioned as a post-mortem process. The other view point with a bent towards the Mimamsa philosophy says that no action ones done, can be annulled.

नाभुक्तं क्षीयतेकर्मकल्पकोटिशतैपि

Karma must fructify and cannot be evaded even in billions of eons without fruition. In this case the emancipated man has already transcended the agency of doership and enjoyer of the fruit of karmas. Since he does not identify himself with the doer , he is not tainted either, nevertheless this is from a metaphysical perspective, materially his non-self continues to be affected by the trail of karmas and their fruition same as before . There is third theory which maintains that the fruit of good karmas go to those who adore and serve the man of enlightenment and the bad ones go to those who hurt and humiliate him.

A man of emancipation or as *Anant Shakti* calls him “the brave one who is never going to be reborn” is satiated by perpetually relishing the real elixir transcends bandage and freedom in one sweep even while living physically. This has been called as the great liberation. The other variant of smaller liberation being the one that follows bondage.

बंधमोक्षौ नविद्येते नित्यमुक्तस्य आत्मनः!

One must keep in mind all aphorisms to get the import of any one correctly.

स्वरूपलाभः

Attainment of one’s essential nature is just the one mentioned in the very first aphorism. A yogi eater in his essential nature goes beyond vice and virtues. An atheist say for example Nietzsche also speaks of “*beyond good and evil*” but that’s from the stand point of no postmortem or prenatal continuation of existence .just one life and one world theory ! Our mystic canons tells us about the end of the conduit with labyrinthine presuppositions of various ethnic, ethical, and religious commitments. The end of the tunnel

in the case of a dilettante is just perpetuating the pursuit of nescience. Adhering to the vicious circle with no tangential emancipation.

Thoughts on the process of creation in the Agamas With reference to *Sharada Tilakam*

Prof Ramesh Kumar Pandey

ABSTRACT

Since out of cause and effect just the knowledge of the cause that leads to the knowledge of the entire effect suffices. So, it can be inferred that after the knowledge of the cause, the primordial power of consciousness must be meditated upon as the supreme power manifest as ‘word as the absolute principle’ i.e. Shabda Brahma(शब्द ब्रह्म).

The Vedic dictum “Karanam tu dheyam” (कारणं तु ध्येयम्) - vindicates this very fact. The knowledge or meditation of entire effect is possible, only by meditating upon the cause. This is the benefit of knowing the process of creation from the perspective of knowing the sequence of cause and effect, that shakti is indisputably determined as the primordial causation. Despite the unity of Shakti and Shaktiman i.e. potency and the omnipotent this is unequivocally propounded in all doctrines that the omnipotent Shaktiman is pervaded by his potency of Shakti since she is innately in unison. Therefore the absolute principle as “Shabda-tattvam” manifests universally, because it is the origin of the universe, manifests as the universe and is the essential nature of the universal phenomena.

INTRODUCTION:

Myriad Vedic dictums like ‘Sarvam khalvidam Brahma’ (सर्वं खल्विदम् ब्रह्म), i.e. all this is verily Brahma, establish this very principle. As a foremost duty of all learned scholars, it is binding on them to inspire the general public for acquiring essential etiquettes and manners after ascertaining the same from the scripture ordained code of moral conduct. This conduces to general wellbeing of humankind. All this can be possible only after a prerequisite of authentic knowledge has been accomplished. The authenticity of knowledge as such comes from the revelations and people of

erudition in the scriptures. In modern age the knowledge contained in the *agamas*[discursive canons of metaphysics] is sufficient and suitable for universal wellbeing directly and without any adaptation. The utility of esoteric tenets is also vindicated by common place experience of all and sundry. Therefore the knowledge contained in the *agamas* should be sought deliberately. Specially the postulations based on power and process of creation as depicted in them is unique and cannot be found elsewhere. No other doctrine has the conduct based on the principle of monistic disposition of the universal self. Even in a common parlance the effect cannot be accessed by ignoring the cause since both are integrated. Therefore keeping in mind that the entire universal phenomena is basically rooted in [*shabda*] expression or word, in this article I shall attempt to exposition the power and process of creation with “word” or *shabda* as its fundamental cause.

The universe in the form of names and forms has been called as comprising Agnisoma[lit. lunar and fire} Sanskrit grammarians maintain the unison of both i.e. word and meaning. Bhartrihari in order to establish pervasiveness and interlacing of word with meaning says

Anuvindh miv jnanamsarvamshabdenbhasate (अनुविद्धमिव ज्ञानं सर्वं शब्देन भासते)

In fact, the universal self alone manifests as the conditioning as well as the conditioned since both lie within the same domain. This one universal self or *Atma* manifests in the form of word as well as its meaning. This accounts for a frequent mention of the unison of the mantra and the meaning of the mantra in all scriptures. Even though apparently separate – the *Agamas* enunciate the unison by defining the meaning or *artha* part of expression as *Shiva* and the *shabda* or word part of a mantra as *shakti*. Despite the unison *Shaba* or the word as such supersedes the meaning part of the expression since the form is pervaded or interlaced by name. The however argument of predominance of *shabda* has more weight in it. In this manner we see the predominance of the *shakti* portion which in turn is *shabda* in creation of the universe and also the empirical soul or as the consciousness of the individual soul which is also a part and parcel of creation. A proper understanding of this very phenomenon follows a strenuous study of the revelations as they propound this very process of *shabdsristi*, or the power and process of creation as word.

Both *Sadashiva*¹ and *Shabda-Brahma* spring forth from a single origin namely the *Bindu* [the point of absolute convergence of collective meaning]

¹An intermediate stage of creation in which the subjective awareness supersedes the objective phenomena.

so whenever we refer to creation as word and meaning we refer to Sadashiv. The knowers of Agamas define *Shabda-Brahma* or the absolute principle as word in terms of the manifestation of the unmanifest *Dhvani* [the eternal word] from the transcendental *Bindu* or *Para Bindu*. Votaries of the agamas maintain that the origin of *Sadashiv* who manifests as *Bindu* and, is all pervasive and the witness of the universal phenomena is *Shambhu* or *Paramshiva* only.

Meritorious aspirants call this indwelling conscious principle as *Shabda-Brahma*. This absolute principle as word pervades the entire universe. Its grosser manifestations are expressed as aesthetic works of art like prose and poetry. The same is expressed alphabetically as the audible sound which originates in the *Shabda-Brahma* which in turn abides within the mystic *Kundalini Shakti* within an aspirant's body. Vedantins name this principle as *Para-Brahma* whereas the same is termed as *Param Shiva* by the exponents of the agamas. Both being essentially the same only the names differ. Thus, the fundamental principle is *Shakti* which is often proclaimed as the universal soul which in turn is expressed as all pervasive and omnipresent *Shabda-Brahma*. This very principle is depicted by the votaries of Vedanta as the ultimate substratum and underlying witnessing consciousness. From this principle the entire universe springs forth, appears and is dissolved. Hence owing to its being the universal manifestation the Upanishad axiom of "knowing all by knowing one" holds good only from this standpoint.

The most import faculty among human beings is discriminatory wisdom this accounts for their supremacy. All men must possess this faculty otherwise they will not be themselves. This also makes it necessary for every man of wisdom to realize the essential nature by developing a subtle viewpoint. The Vedas also ordain –

Tasyayonimparipashyanti dheerah (तस्य योनिं परिपश्यन्ति धीराः)²–

Wise men behold his origin in entirety.

The term *dheerah* in this parlance pertain to men of discriminatory wisdom. This is why all revelations begin with contemplation on the origin of the universal phenomena elsewhere this tradition continues discreetly for example in the thousand names of the supreme divine mother,

Shri matashrimaharajnishrimatsimhasaneshwari (श्रीमाता श्रीमहाराज्ञी श्रीमत्सिंहासनेश्वरी)³

²Yajurveda chapter 31, *Purusha Shukta* mantra 18

³*Brahmanda Puranam*, Lalitakhanda, Sahasranama verse 1

The notion of motherhood signifies origin or God, the creator as divine mother. Empress or *Shri Maharajni* denotes the sustaining principle

In the name “the enthroned one”, there is a play on the word *simha* which in reverse would mean *hamsi* or you the destroyer. The presiding deity of prana or the vital air in this case accounts for the process of dissolution or *Samhar Shakti*.

Describing the process of creation, the *Bhagavatam* says that before the creation Brahma is deluded about his own origin and finds himself unable to create. He is ordained for penance by receiving the two-alphabets -the 16th and 21st. i.e. *ta* and *pa*⁴. This penance or *tapa* predates even the creation of both types i.e. word and meaning.

The agamas and tantras the same has been conceptualized as the notion of “self” and supreme self” referred to as *ahanta* or *puṇahanta*. In this context it will not be out of place to mention the eternal Shiva is known as with and without attributes *nirguna* or the attribute -less one is the one who lies beyond *prakriti* or nature where as *saguna* is *sakala* or with fragments and conditioned in nature.

nirgunah sagunascheti shivo jneyah sanatanah

nirgunahprakriteranyahsagunahsakalahsmritah.

(निर्गुणः सगुणश्चेति शिवो ज्ञेयः सनातनः ।

निर्गुणः प्रकृतेरन्यः सगुणः सकलः स्मृतः ॥)⁵

In this verse the absolute principle has been defined in two way firstly as with attributes and secondly without them. The first form different from *prakriti* [*anyah*] is not related with *prakriti* or nature this however does not signify his being different from nature and not pervading as his nature. One must cogitate upon the case in the word *prakriti* in above verse. According to the rules of Panini’s grammar [words *anya,arat, rite,itar,dik,shabda, anchu,uttar, pada, aja* and *hi* must be flowed by the fifth i.e. ablative case].*But in fact the sixth case in a genitive sense fits into the context. Otherwise with fifth ablative case, Shiva will have to be understood as different from his nature or *prakriti*. This conflict the principle of the agamas which do not admit separate disposition of Shiva and *Shakti* owing to

⁴स्पर्शेषु यत् षोडशविंशमेकम् –*Shrimad Bhagavatam*, 2/9

⁵*Sharadatilakam*, 1/6, page no. 13, Sampurnanand Sanskrit University, Varanasi

perpetual unison or non-duality. Absence of relation between Shiva and *Shakti* leads to the justification of the sixth case which signifies relationship. The absence of relationship in order to justify the sixth case can be explained in the following way. There are two stages of Shiva as conceptualized in the tantras, the divergent one which accounts for the experience of duality and plurality as different from the essential nature, the other one i.e. the convergent state is the seating of Shiva in his essential nature. The cause of divergence is being united with his *kalas* or the digits of his *chitshakti* or consciousness. Thus by exhibiting the *kalas* it follows that one singular entity manifests as *Shiva* and his *prakriti*. Since in the state of convergence only Shiva remains as seated in his essential nature, therefore, we intend to propound only an absence of relation or *sambandha* and not any difference between Shiva and his *Prakriti*. I would like to quote a proof from *Prayogasara* and *Narayaneeyam* .

Nityah saarvgatah skshmah sadanando niramayah

Vikarrahitah sakshi shivojneyah sanatanah

Niskriyam nirgunam shantam anandam ajamavyayam

Satyam budheh param nityamnirmalamniskalamsmritam.

(नित्यः सर्वगतः सूक्ष्मः सदानन्दो निरामयः ।

विकाररहितः साक्षी शिवो ज्ञेयः सनातनः ॥

निष्क्रियं निर्गुणं शान्तमानन्दमजमव्ययम् ।

अजरामरमव्यक्तमज्ञेयमचलं ध्रुवम् ॥

ज्ञानात्मकं परं ब्रह्म स्वसंवेद्यं हृदि स्थितम् ।

सत्यं बुद्धेः परं नित्यं निर्मलं निष्कलं स्मृतम् ॥)⁶

The Shiva should be known as eternal, all pervasive subtle always blissful and devoid of any ailment. He is without any modifications the eternal witnessing principle. The neutral, attribute less, subtle, placid,

⁶Padarthadarshatika, *Sharadatilakam*, page 9, Sampurnanad Sanskrit University.

blissful, stable and eternal absolute principle is all conscious and indwells the hearts of all beings as a self-evident entity. He is described in the scriptures as beyond reason eternal taintless, without any fragmentation.

Siva with his attributes is also ascertained in the same manner. The reason behind his being with attributes is being accompanied by *prakriti* and her *kalas*. The exponents of Samkhya philosophy determine nature as a synonym of *Pradhana* which is the state of equilibrium of the three guans viz. *sattva*, *raja* and *tamas*. Shiva as united with these *kalas* and *prakriti* comes to be saguna or ‘‘with attributes’’ since *prakriti* is made from the three gunas. This *prakriti* is called nescience in Vedanta and in the Shaiva tantras she is called as *shakti*.

Tat shakti bhutah sarvesho bhinno brahmadi murtibhih

Karta bhokta ch samhartta sakalah sa jaganmaya

(तच्छक्तिभूतः सर्वेशो भिन्नो ब्रह्मादिमूर्तिभिः ।

कर्ता भोक्ता च संहर्ता सकलः स जगन्मयः ॥)⁷

The supreme lord along with his *Shaktis* is different from the manifestations like Brahma etc. he is the doer, enjoyer and the annihilator. He is united with his *kalas* and manifests as the whole universe as his embodiment. Even the question of creation does not arise in the case of attribute-less Shiva, who is ever absorbed in his essential nature since there is no possibility of any creative flutter or *kshobha*. Nor is his being the creator refuted owing to excess inertia as he is united with his nescience. This has been explained in the following cantos of *Sharada Tilakam*:

Satchidanandvibhavad sakalat parameshwarat

Aseetshaktihtonadahnadabindusamudbhavah

(सच्चिदानन्दविभवात्सकलात्परमेश्वरात् ।

आसीच्छक्तिस्ततो नादो नादाद् बिन्दुसमुद्भवः ॥)⁸

⁷Padarthadarshatika, *Sharadatilakam*, page 14, Sampurnanad Sanskrit University.

⁸*Sharadatilakam*, verse 7

This explains that the appearance of inertia is due to an induction of attributes through proximity its being owing to its being virtual the all conscious nature remains unquestioned. The phrase *shaktihaseet-shakti* sprang forth from the Parameswara who gets conditioned and is of the nature of existence consciousness and bliss – the Shakti that is eternally united with the absolute principle cannot generate another Shakti. Therefore, the term generation of Shakti in this case is only for the name sake. This indicates that during the causal state of dissolution the Shakti remains in the form of subtle *Chaitanyabhasa* or the apparent impression of consciousness. Due to a disturbed equilibrium of the three *gunas* in order to generate the would be phenomena comprising these *gunas* and their effect -she ‘‘swells’’ i.e. becomes *uchoona*. In this manner she accounts for the process of creation of the universal phenomena. This has been vindicated in *Prayogasara*.

Tasmatvinirgatanityasarvathavishvasambhava(तस्माद्विनिर्गता नित्या सर्वगा विश्वसम्भवा)⁹

From him originates the eternal one from whom the universe is created.

shivechhaya parashaktih shiven ekatam gata

Tatah prisphuratyadau sarge tailam tiladiv

(शिवेच्छया परा शक्तिः शिवतत्त्वैकतां गता ।

ततः परिस्फुरत्यादौ सर्गे तैलं तिलादिव ॥)¹⁰

The transcendental Shakti who is in unison with Shiva, by the will of the lord the universe is projected like sesame oil from its seeds.

We have clearly explained the modification of ‘the one with attributes from the attribute less. In this parlance seers of other doctrines also attribute time or *kala* as the cause. Hence all three viz. Nada, Bindu and Beeja originate from the Parameswara who has the grandeur of existence consciousness and bliss.

Evamalockyasargadausachhidanandrupinim

Samastatattwasanghatmasphurtyadhistanrupinim

Vyatkamkarotinityam tam prakritimparamahpuman

⁹Padarthadarshatika, *Sharadatilakam*, page 14, Sampurnanad Sanskrit University.

¹⁰Vayaviasanhitā

(एवमालोक्य सर्गादौ सच्चिदानन्दरूपिणीम् ।

समस्ततत्त्वसङ्घातस्फूर्त्यधिष्ठानरूपिणीम् ॥

व्यक्तां करोति नित्यां तां प्रकृतिं परमः पुमान् ।)¹¹

Sa tatwasanjachinmatrajyotishassannidhestada

(सा तत्त्वसंज्ञा चिन्मात्रज्योतिषः सन्निधेस्तदा ।

विचिकीर्षुर्घनीभूता क्वचिदभ्येति बिन्दुताम् ॥)¹²

In the beginning of creation, the ultimate purusa, contemplating in this manner unfolds his eternal nature or prakriti. She the nature of existence, consciousness and bliss besides being the substratum of oscillation of the cluster of elementary constituents of the phenomena.

The primordial power of consciousness comes to be called tatwa owing to the proximity of the light of consciousness. And thus, consolidates into the form of Bindu. There are many such dictums in support of this theory in the agamic canons.

Abhivyakta parashakti avnabhav lakshana

akhandparchitshaktiVyaptachidrupinivibhuh

Samasttawabhaven vivartechhawamanvita

prayatibindubhavam cha kriya pradhanyalakshanam

(अभिव्यक्ता पराशक्तिरविनाभावलक्षणा ।

अखण्डपरचिच्छक्तिर्व्याप्ता चिद्रूपिणी विभुः ॥

समस्ततत्त्वभावेन विवर्तेच्छासमन्विता ।

प्रयाति बिन्दुभावं च क्रियाप्राधान्यलक्षणम् ॥)¹³

The transcending Shakti who is inseparable from Shiva, complete, and all-pervasive power of consciousness, magnanimous and embodiment of consciousness attains the form of a Bindu with a predominance of Kriya Shakti as she unites with her desire to modify herself in the form of all tattvas.

¹¹Pancharatram

¹²Padarthadarshatika, Sharadatilakam, page 14, Sampurnanad Sanskrit University.

¹³ ibid

Shiva himself modifies in the form of *nada*, *bindu* and *beeja*. *Bindu* is Shiva, *beeja* is Shakti and *nada* is their union. This is why the word *samavay* [combination] has been used in *Sharadatilakam*.

Binduh shivatmakō beejam shaktih nadastayormithah

Samvayah samakhyatah sarvagamavisharadai

From the *Bindu* related to Rudra, the Shakti of Rudra springs forth. This Shakti assumes the form of Shiva. Therefore, she is elder to *nada* and hence called *Jyeshtha* [lit. the elder sister]. From the *beeja* or the primordial seed *vama* is born. This *vama* is also an embodiment of Shakti only.

All this has been enunciated in *Prayogsara*.

Binduhshivatmakāhtatrabeejam shaktyatmakam smritam

Tayormadhyāebhāvennadastebhyojatastrishaktayah

(बिन्दुः शिवात्मकस्तत्र बीजं शक्त्यात्मकं स्मृतम् ।

तयोर्मध्ये भवेन्नादस्तेभ्यो जातास्त्रिशक्तयः ॥)¹⁴

Bindu is the embodiment of Shiva whereas *beeja* is that of Shakti. The *nada* that mediates both upon their uniting with one another generates the three shaktis viz. *jnana*, *ichha* and *kriya*. Thus, there is a modification in the form of the powers of knowledge, will and action these are presided over by the trinity gods i.e. Brahma, Vishnu and Rudra, the Shaktis of action belong to Brahmani, will to Rudra and *jnana* are related with Rama.

This has been vindicated in *Ishwarpratyabhijna*

Yatichhanti tad kartumjnatumvaswechhaya kriya

Anantaram hi tat karyaajanadarshanshaktita

(यत इच्छन्ति तज्ज्ञातुं कर्तुं वा स्वेच्छया क्रिया ।

अनन्तरं हि तत्कार्यज्ञानदर्शनशक्तिता ॥)¹⁵

Since an action is desired and enquired of the doer's own accord then only the power of knowledge , action and will accrue.

¹⁴Kriyasara

¹⁵Ishwarapratyabhijna

In other *agamas* the trinity gods, Brahma Vishnu etc. are seated within the mandalas of the sun, the moon and the fire, their order is also mentioned in the manner of creation, sustenance and dissolution. There is a popular hymn in the felicitation of Sharadamba:

Shabdarth bhavi bhuvanam srjadenduroopa

Ya tad bibharti punarark tanu swashaktya

Brahmatmika harat tat sakalam yugante

Tam sharadam manasijatunavismarami

(शब्दार्थभावि भुवनं सृजतीन्दुरूपा

या तद्विभर्ति पुनरर्कतनुः स्वशक्त्या ।

ब्रह्मात्मिका हरति तत् सकलं युगान्ते

तां शारदां मनसि जातु न विस्मरामि ॥)¹⁶

Mother Sharada creates the universe comprising names and forms by acquiring the form the moon [the moon of consciousness or chit Chandra], sustains it through her prowess by acquiring the form of the sun [chitsurya]. She then becomes Brahma, the absolute principle and she dissolves everything through her divine wisdom by ascertaining its ephemeral and virtual nature.

Shakti has been depicted as three-fold in *Goraksha Samhita*. They are Gauri as will, Brahmi as action and Vaishnavi as knowledge. Some acharyas opine that owing to the inert nature of word, since it is a property of ether, it can be only insentient. This has been refuted here, since all philosophers who are masters of Vedic learning assert *Shabda* or word as Brahma, the absolute principle.

This has been said

*Kriyashaktipradhanayashabdbrahmarth
prikrtahndurupinyahshabdbrahmabavat param.*

Karanam

¹⁶*Sphutashloka*

(क्रियाशक्तिप्रधानायाः शब्दब्रह्मार्थकारणं प्रकृतेर्विन्दुरूपिण्याः शब्दब्रह्माभवत्परम् ।)¹⁷

The absolute *Shabda Brahma* originated from *prakriti* who manifest as Bindu and exceeds in *kriyashakti*. The above mentioned Shakti becomes eight-fold due to coming in contact with various conditionings like *jati* and *vyakti* etc. Acharya Utpaldeva admits that inner sphota which manifests as word and meaning is

निरंश एवाभिन्नो नित्यो बोधस्वभावः शब्दार्थमयः अन्तरस्फोटः¹⁸

The inner sphota or antarsphota which comprises word and meaning is in fact the whole, unfragmented conscious principle.

This principle is supported by Bhartrihari. In his *magnum opus*, *Vakyapadiya*, this very entity has been felicitated as

Anadinidhanam brahmashabdatatvam yad aksharam.

(अनादिनिधनं ब्रह्म शब्दतत्त्वं यदक्षरम्)

Bindu modifies into *nada* and turns into *varnas* or alphabet. It is why the insentient nature of word or *Shabda* stands refuted and its sentient nature remains established. The same has been mentioned in *Sharada Tilakam*

Nahi tesam tayoh saidhi jadatvadubhayaorapi

Chaitanyam sarva bhutanam shabdbrahmeti me mati.

(न हि तेषां तयोः सिद्धिर्जडत्वादुभयोरपि ।

चैतन्यं सर्वभूतानां शब्दब्रह्मेति मे मतिः ॥)¹⁹

Owing to their interlacing, all entities as sentience I maintain that this is the absolute principle in the form of word. This *Shabda Brahma* upon synchronizing with Kundalini Shakti [the serpent power in the coccyx plexus], modifies as *Madhyama nada* within all creatures. After being united with *dhvani* or the eternal word that resonates perpetually the same bifurcates as name and form and thus manifests as *varnas* or Sanskrit alphabet.

This been said in the following canto

¹⁷Gorakshasanhita

¹⁸Utpalacharya

¹⁹Sharadatilakam, Shloka no. 13

sontaratma tada devi nadantma nadate swayam
yathasamthan bheden sabhuyovarnatamgatah
 (सोन्तरात्मा तदा देवि नादात्मा नदते स्वयम् ।
 यथा संस्थानभेदेन स भूयो वर्णताङ्गतः ॥)²⁰

“O! Goddess, then the innermost self as the eternal word or nada spontaneously resonates just as it acquires the form of varnas according to its locus in various plexuses. Bhartrihari also opines that the miniscule of Vayu the conscious principle manifests as Shabda. He also mentions the places of origin of varnas in various parts of the subtle body. Sage Patanjali however maintains that the innermost self-atman modifies into the form of Shabda hence adjectives like Bindu, kalabandha, Shambhu etc. pertain only to Shiva. Various manifestations of Shiva like Sadashiva the witness of the universe etc. originate therefore the order of creation turns out to be as follows: Isha is born from Shiva, from Isha, Rudra is born, from Rudra Vishnu and from Vishnu, Brahma originates. This is the order of creation as per the doctrine of Patanjali. The instrumentation of *kala* is expressed in all these modifications. This or time has been defined by Patanjali as ‘the agency which signifies the growth and destruction of entities is kala or time’.

Yen murtinam upachaya apachayashchlakshyantesakalah[kala].
 (येन मूर्तीनामुपचया अपचयाश्च लक्ष्यन्ते स कालः)²¹

The attributes and characteristics of kal are given in other scriptures too.

Lavadi pralayantoyam tamah shakti vijrambhitah
Nimitbhutah kalaoyam bhavanam janm nashayoh
Anadirbhagavan kalo nantosya dwij vidyate
Atuchnna tatasvete sargsthityant samyama:
 (लवादिप्रलयान्तोयं तमः शक्तिविजृम्भितः
 निमित्तभूतः कालोयं भावानां जन्मनाशयोः ।
 अनादिर्भगवान् कालो नान्तोस्य द्विज विद्यते

²⁰Padarthadarshatika, *Sharadatilakam*, page 17, Sampurnanad Sanskrit University.

²¹*Mahabhashyam on Panini Sutra 2.2.5*

अत्युच्छिन्नास्ततस्त्वेते सर्गस्थित्यन्तसंयमाः ॥)²²

The kala ranging from a lava [trice] up to dissolution or par lay spring forth, due to the power of tamas of the primordial shakti. It an agency that accounts for the origin and dissolution of all entities. This time personifies as the lord is beginning less o twice born, nor does it ever come to an end. So, all these creation sustenance and dissolution etc. are very ephemeral.

Athbindvatmanahshambhohkalbandhokalatmana

(अथ बिन्द्रात्मनः शम्भोः कालबन्धोः कलात्मना)²³

In their exposition of above canto from *Sharadatilakam* Kala and the long aA, the fourth of the four stages of atma has been indicated. Hence by kala can be a synonym of ark or the sun, *Surya* or the creator,etc. all consonants between ka and la are also included in the abbreviation kal.Since there is a mediating vowel A in the word vowels are also included. Another rendering of the word *kala* is *Mahakala* according the maxim of understanding the entire name by mentioning just a portion of the name.

The manifestation of Mahakal as Rudra is understood by the word kala. In this manner if we put all these interpretations in one place *kama* beeja or the seed syllable of cupid i.e. *kamabeeja* can be derived.This indicates that the primeval willpower has Shambhu as the root. This can be further established by following proof from *Padarthasarshini* gloss on *Sharada Tilakam*.

*Bhutendriyantah karanmayainanenduagnirupam samastam
varnatmaitatatpradhane kalanayanmaye beejrupakramena.*

*Neetva tam pumsi bindvatmani tamapi swatmanyatho kal tatve. tam vai

The entire universe in the form of five elements, mind intellect heart and ego characterized by the fire the sun and the moon and from is in fact to be understood from the view of predominance of alphabet or matrikas .alphabet

²²*Padarthadarshatika, Sharadatilakam, page 18, Sampurnanad Sanskrit University.*

²³*Sharadatilakam, Shloka no. 15*

²⁴*Padarthadarshatika, Sharadatilakam, page 18, Sampurnanad Sanskrit University.*

should merge into the Bindu, Bindu merges into the purusha in turns merges into Bindu and Bindu into kala which is the substratum of the Bindu. Thus, pursuing the method of dissolution, the kala tattva should be merged into shakti. Shakti finally dissolves into the transcendent abode of absolute quietude Shanti Dham

Other thinkers maintain that Shaiva is denoted by the letter 'ha', the empirical soul is *kala* and the half-nasal accent [ardhendu – denoted by a crescent moon with a dot within it] *kalagni* or the fire of dissolution is Bindu in this manner the Maya Beeja also called *Shakti Pranava*, is derived. The entire universe springs forth from this seed syllable.

Utpalacharya while explaining *swasminpraseedvishweshha* (स्वामिन् प्रसीद विश्वेश)²⁵, defines *Pramita* as Prakriti owing to her objective disposition. Pramita or the special experiencer is Purusha likewise according to the etymology *pramintoti* or conditions the conditioning or limiting agency is *kala* or time. The nomenclature of conditioned entities or in this manner *pramitaksharam* i.e. *Para Vak*. 'Ha' is the essence of this vak. This *hakar* or the aspirate guttural mixed with nada or nasal accent is the union of *bindu* and *nada*. The same has been illustrated in the following cantos of *Vamakeshwar Tantra*.

From the unmanifest word which is the primordial cause the manifest embodiment of *satoguna budhi* or intellect originates.

Avyaktavighrahatshabbrahmanahsarvkaranam

Vyaktsatvagunamsatvambudhitatvamajayat

(अव्यक्तविग्रहात् शब्दब्रह्मणः सर्वकारणम् ।

व्यक्तसत्त्वगुणं व्यक्तं बुद्धितत्त्वमजायत ॥)²⁶

The unmanifest comes to be signified as *mahat* when it gets manifest. From the *mahat* three types of *ahamkarsa* are born. Owing to it's uniting with the three gunas, the ahamkara or collective ego namely *vaikarika* or satvik and rajasika or tamasic. The five different elements are created from the tamasic ahamkara.

²⁵Utpalacharya

²⁶Vamakeshwara Tantra

The order of creation from subtle to gross has been enunciated in the following manner in sharadatilakam.

The crux of the above article is that whatever is experienced as the universal phenomena is interlaced by word or *Shabda-Brahma*. *Prana Shakti* or the vital air in the form of mantra pervades the entire universe. Therefore, even in a common parlance, in a state of deficit *Shakti* the resonance of *Shabda* is not experienced. But whenever *Shakti* is united, the resonance of *Shabda* is clearly experienced.

Bhartrihari has proclaimed that there is no entity in this world which can be enunciated without being interlaced by *Shabda* or the word

All knowledge gets evident as if it were to be pervaded by *Shabda* or the word.

Na sosti pratyaya loke shabdanugamat rite

Anuvindh miv jnanamsarvamshabdenbhasate

(न सोस्ति प्रत्ययो लोके यः शब्दानुगमादृते ।

*अनुविद्धमिव ज्ञानं सर्वं शब्देन भासते ॥)*²⁷

It is why it comes out to be our first and foremost obligation that all verbal interaction must involve purity of speech? Slang [apabhransha] and vulgarity [apashabd] should be avoided since it leads to the cessation of power. Refined and virtuous expression on the other hand generates immense merit.

This is also vindicated by the following dictum.

Ekah shabdah samyakjaytah suprayuktah shatranvit swarge loke cha kamadhukbhavati.

(एकः शब्दः सम्यग्ज्ञातः सुप्रयुक्तः शास्त्रान्वितः स्वर्गे लोके च कामधुग् भवति ।)

Even a single word after knowing perfectly and vindicated by the evidence of scriptural authority is wish-fulfilling like a cow of gain in the heaven and this world as well.

A man with discipline of speech whose expressions are flawless attains the fruit like the one generated by repeating a mantra [holy syllable] A man can attain this fruition spontaneously, just by observing the purity of speech.

²⁷Vakyapadiyam, Brahmakanda – Karika 123

PPRATYABHIJNA HRIDAYAM MADE EASY

Swami Parananda

Sutra 1: chitih swatantra vishwa siddhi hetuh

Translation: The power of consciousness accounts for creation etc. independently

Exposition:

Visva Siddhi- is the process of universal manifestation comprising thirty six /thirty five elements .Some translators mean the accomplishing of all five fold functions attributed to *Param Shiva* viz. Creation, sustenance, dissolution, and redemption .

Swatantryam or independence ,redefined-

The power of consciousness is *swatantryam* .*Swatantra* has been defined as the nature of ultimate gnosis –“*Anuttara vimarsha*” and thus is ever in eternal unison with *Param Shiva* within which she herself manifests as the universe , sustains and dissolves it. This can be experienced only subjectively. The objective experience pertaining to insentient and essenceless *maya* or *prakriti* can not be the cause or *hetu*. On the other hand the self -illuminating entity or *prakash* itself is the cue owing to the unison of the universal phenomena with *prakash*. So *Chiti* the transcendent entity alone accounts for the power and process of creation and is not something conditioned in time and space but is born from it and is sustained by it. The universe is not something different from the *Chiti* so how can these two be the cause and effect. The Goddess of consciousness projects herself in the form of infinitesimal universal phenomena hence the cause and effect relationship is consistent. Moreover she accounts for the appearance of this universe divisible in the form of experience, experiencing and experience. Therefore no testimony of evidence is fit or needed for proving her. Because she is free, unconditioned and self evident. All proofs are required to vindicate some new entity.

Trik sara tells us the analogy of the futility of a man who tries to jump over the shadow of his own head like wise the *bindu kala* the transcendental dot which is beyond the range of will, wisdom and work trio[*jnana*, *ichhca* and *kriya*] cannot be transcended by any effort actual or intellectual .Since this power of consciousness accounts for the process of creation and also

dissolution which is in the form of transcendental, no due homogeneity she is free and independent . Once her independent nature has been established she accomplishes both emancipation and enjoyments (bhoga and moksha). This is yet another rendering of the term vishvam .

Since Chiti accounts for the creation and dissolution of the phenomenon as not different from Pure Consciousness (Samrasya is homogeneity with the non -dual principle)- she is called swatantra or ‘Free Will’. Hence due to her virtue of being swatantra- free- she is the agency accomplishing Bhoga and Moksha both.

There is a famous saying among the devotees of chitshakti .

“Yatrasti bhogi nahi tatra moksha, yatrasti moksha nahi tatra bhogah
Shri sundari sevan tatparanam bhuktishch muktishch karasth eva”

“One can not have the cake and eat it too . If enjoyments no emancipation if emancipation no enjoyments but a worshiper of the divine mother can accomplish both concomitantly.”

Khshemraj while commenting on his own aphorisms gives an alternate meaning of the word “vishvam” – bhog and moksha . She is free, so she can emancipate her aspirants even as enjoying worldly pleasures and she can also provide worldly enjoyments to her aspirants even while they are pennant and engaged in moderation. Yet another meaning of the word vishvam i.e. entirety pertains to a more subjective perspective both explicit as well as implicit. In the lingo of the Agamas , the world or the complete objective whole has been acrimoniously defined as sukha, prana, neel etc. This is presumably an undermining of the conventional phenomena to facilitate its transcendence. So the term Visvam in this version of interpretation is the entire phenomena consisting of body, joy, perceptions like blue, prana-vital airs etc. The divergence of awareness from absolute subjective consciousness to various gradations of objectivity accounts for the special phenomena called *unmeelanam* or unfolding . The order of awareness descends from *Pramata* [experiencer] to *Pramana* [experiencing] to *Prameya* [object of experience]. This term chitih is very significant when it comes to defining ‘consciousness’ by modern cognitive scientists.

Consciousness, the sentience in ancient life science used to be defined as the agency that accounts for functions like, respiration, locomotion, reproduction and a few more. This however refers to it as an objective entity and to be

cognized in only the subject under study. Eastern metaphysics enunciates the subjective portion of the consciousness usually referred to as *Pramata* who in its conditioned form comes to be called *Apar pramata* or *Maya pramata* i.e. inferior experiencer , or *Parichhinna pramta* or the empirical experiencer so on and so forth . *Chiti* is derived from a root *chiti sajnanne* which means to know or to cognize. In this aphorism the power of consciousness or *chitshakti* is explained.

There are two streamlines of consciousness – a layman’s and a yogin’s – Object and Subject difference is same to both but Yogins are conscious of the subject and object relationship. The latter is not acquired just by learning. One is supposed to get it first hand when one actually meditates and tallies with his experiences. An uninitiated person who has not yet learnt about his spiritual existence beyond the body, mind and senses perceives the world only through his limited vision and is oblivious of the perceiver and the process of perception .

A yogi as per an often quoted canto of the tantras also shares a conventional view point of the layman but at the same time does not loose sight of this identity and unison with the ultimate seer or *Param Shiva* . He further descends to various levels of proportions of seer and seeing and at the same time maintain the awareness of his ultimate identity.

Even if a yogi is engaged in every detail of the exterior gross sense objects he doesn’t lose sight of his unison with Brahman the absolute just as a danseuse even while maintaining an awareness of rhythm, beat, tune and steps does not lose the sight of a pitcher or a trail of pitchers balanced on her head .

The term *Chiti* has been used as singular .This rules out any other entity intellectual or actual . Her dual and multiple aspects are also refuted by this use of singular for *chitih* .

Swatantryam or independence ,redefined-

Since *Chiti* accounts for the creation and dissolution of the phenomenon as not different from Pure Consciousness (Samrasya is homogeneity with the non dual principle)- she is called swatantra or ‘Free Will’. Hence due to her virtue of being swatantra- free- she is the agency of accomplishing Bhoga and Moksha both. Independence is the virtue of not depending on any other

entity for accomplishing some objective in this parlance the five fold function of the universal phenomena .This swatantraym which we have defined as free will must not be confused with the talks of yes or no to free will that is prevalent these days . Even from a metaphysical stand point'' free will'' is not consistent as *apriori* of creation or unfolding of the phenomena sine the apparatus of will are yet to manifest. The power of consciousness as the ultimate entity is visualized by aspirants of grosser view point as the divine mother seated on a dais with four legs as Brahma ,Vishnu , Rudra, Ishwara and Sadashiva as the plank . She decrees these five deities for their respective actions. She on the other hand is not under any other entity's sub-ordinance. This is the essential meaning of the term swatantra . There is a popular Suktam in the Rigveda called *Atma Suktam* or *Devi Suktam* . The power of consciousness or chitshkti dawned upon a seer's daughter called vagambhrini and she unveiled her mystic secrets in the form of a Suktam .

I blow unrestricted like wind as I create multiple
realms of the cosmos .

With my divine magnanimity and infinite expanse –
I transcend the earth ,sky , the space , the entire cosmos.
I pervade this entire universe with my body .

[*Devi Suktam*]

In the beginning , Kshemraj has mentioned that this *Pratyabhijna Hridayam* is the essence of the Shavite upanisad presumably *Ishwar Pratyabhijna* to befit the competence of mediocre aspirants who have no erudition in syllogism and grammar but are full of faith and devotion and through faith and devotion who have received the induction of the power of consciousness and are able to recognize their unison with the ultimate Shiva or Shakti who are not different from one another .

Since Citti is used as a singular, not conditioned by time and space the system advocates a form of Monism which refutes all the dualistic theories. The word 'Svatnatra' used with 'Chiti' essentially stresses the point that Chiti is independent of any other entity and hence is free will unlike the doctrine of Brahman proposed by Shankara Vedanta in which Cit is considered to be inactive. The Sutra further suggests it` is rather due to the unlimited will of Chiti that the entire phenonomena is seen to be unfolded and if one realized the power of Chiti in its true sense then the path to emancipation is not far. The term 'Vishvam' etc. also refers to the state of being endowed with all Shaktis, the universal cause, attainability without any discomfort and

granting the greatest fruit that is emancipation. If Chiti is the primordial cause of the universe she must also be the fundamental or instrumental cause so duality cannot be ruled out.

To answer this interjection the following aphorism goes as ‘ *Svechhaya Svabhitau Visvam Unmilayati*’

(Published from *YTA Google Classroom*)

WISDOM FROM SHIVA’S RATTLE-DRUM (11): खफछठचटतव्

Swami Parananda

ABSTRACT

Universe and its power and process of creation . The blue print of objective appearance *antaryami* and *sutratma*, word , celestial beats and their grosser manifestation. The order of subtler manifestation consequence of the aphorisms . Previous aphorism's senses of knowledge to the present aphorism's pranas and cognitive apparatus.

Prana interlaces the cognitive apparatus . Upanishadic concept of *pranas*. The metaphysical “string theory “. Diabolic trend and erroneous commitment gross pranas that interlaces only the physical body. The sect of atheists and their denial of any subtle phenomena. The anecdote of “the senses went racing” .An ancient Vedic axiom of prana. The origin of prana and what originates from it. The omnipresent Supreme Being as interlacing pranas.

Keywords: Pranas , mind reason and ego , unmilanam, instrumental cause

11. खफछ्छठचटतव्

From these letters of the eleventh aphorism, five vital airs and three inner sense organs viz mind reason and ego are generated .

प्राणादिपंचकंचैव मनोबुद्धिरहंकृतिः

बभूवकरणत्वेन खफछ्छठचटतव्

The five pranas ,mind and intellect sprang forth as the instruments of consequent

Process of creation ,from the eleventh beat .

वर्गद्वितीयवर्णोत्थाःप्राणादिपंचवायव

मध्यवर्णत्रयाज्जाताःअंतःकरणवृत्तयः

Drum beats have an ancient tactics of accumulating spiritual synergy of troop .their usage as morale booster in the recorded history goes back to *Iliad* and in the prehistoric eon to the Vedas . Rhythm and beat has been an integral part of the aboriginal culture this innate bent towards syncing with niche evolved firstly as the onomatopoeic imitation of natural sounds and then as sophisticated feats of percussions .The beat as such followed the same course of evolution in the orient as well the Occident. Their semblance and depiction

of metaphysical phenomena however came to be discovered in the eastern thought as an expression of the all pervasive pashyanti mode of vak .

This also explains the effect of percussions on human spirit in a metaphysical parlance . Drums, rattle drums, chod etc are used to induct awareness feed back in the cases of acute awareness deficiency (HADS) hyper awareness deficiency syndrome many centuries before the advent of modern psychology. In the inner reaches of the Himalayas total memory loss, amnesia, and depersonalisation due to excessive fear, anxiety or any other reason has been successfully treated through shamanic beats and incantation . Sorcerers which are also named as exorcists, ghost busters ,sin eaters in the west ,jhanki, jhanki Jha Ojha, lingdoh daba or taba in the Himalayan and trans -Himalayan belt are common place even in the days of computers and internet . The subject is depersonalised and then trans- personalised and behaves like an entirely different entity. The shaman or Ojha first exorcises the “foreign personality” and then invokes the personality of the subject . Besides oral incantations drums and at times also accompanied by bronze cymbals and chimera play a very effective role in the process of casting out evil spirits and restoring the original personality of the victim . Beats and rhythm has also been an essential part of certain “Demi-spiritual rites 'performed for invoking superhuman deities in the mediums who are frequently subject to such depersonalisation and personality restoration process. Deities of mythological or epical origin ,ancestors , tutelary deities communicate through these medium for divination ,prediction and similar superhuman undertakings. All of This as it were works on the principle of reverting back to the origin .The beats and sound being the substratum of existing mental and spiritual cacophony are used to reverse the process of the reciprocation of nescience and it's produces . This is employed for reinstating the personality and awareness after such perpetuated eccentricity has taken its toll in the form of hyper awareness deficiency syndrome . The last aphorism and the fourteenth beat of Shiva's rattle drum is the culmination of phenomena By seating the aspirant in his essential nature I.e. the universal. The synchrony of Various Gates beats and various limbic movements in the Indian cultural predates the western inclusion of drums and marching . Dundubhi is a prehistoric drum which has been felicitated as an embodiment of Rudra .Up-till recent days *dundubhi* also called as nagada is colloquial language used to be used for invigorating and motivating troop . The nagada of March or kooch ,the drum of jujharu or eyeball to eye ball combat . There are many tantrums of spells and

enchantments which can demoralise and immobilise the enemy just by beating the drum in a specific manner .

Ancient seers discovered that just as the dundubhi activates and invigorates limbic movements subtle beats or mystic origin can and does invigorates the subtle phenomena. Subtle drum or *dundubhi* is called क्षुद्र दुंदुभिः in Sanskrit i.e a little drum . The little drum as such invigorates the subtle phenomena I.e. mind ego and reason . According one ancient school of logic prana activates the apparatus of cognition because they emanate from the prana of the cosmic being. It the cosmic *prana* or *sutratma* that interlaces individuals and the stream of this pranic consciousness runs through all sentient creature from a unicellular ameba to the presiding deity of cosmic intellect or महत्।

वर्गद्वितीयवर्णोत्थाः प्राणादिपञ्चायव

मध्यवर्णत्रयाज्जाताः अंतःकरणवृत्तयः

Albeit Nandi relates the first five sounds to the five vital airs and the remaining three to mind intellect and ego ,Prana and mind ,prana and ego,prana and reason synchrony can also be construed from this aphorism .we have discussed prana and mind relation as per the Upanishadic dictum ,prana and reason relation is also vindicated by the” pranic string theory “ Ego or the agency that determines meum and tuem ,like other two cognitive faculties is also pervaded by prana .That is why we have various variants of ego . an aberrant self assertion , intellectual dominance or subservience, and innate self esteem confidence ,the faculty of choice making volition etc originate from various combinations of prana and cognitive faculty rapport . The construes of *antahakarnam* or inner organs are not different from their substance. One singular consciousness becomes conditioned and manifests as -mind ,reason, ego and heart owing to its functor of imagination, cogitation ,meum and feeling . The fourth one is included only in vedantic methods .The agamas including Shiva tantras have only three and the fourth one is usually referred to as Prakrit owing to some mystic phenomena. Nandikeshwara seems to be a votary of agamic tradition which originated with the manifestation of the aphoristic beats-since as per the tradition no wisdom could have predated them.

This is the metaphysical explanation of pranayama or breath control . Sage Patanjali defines breath control as the means for the intuitive recognition of the essential conscious nature .the method he gives is forceful exhalation and holding the breath . This according to him leads to a cessation of the veil that conceals the light of consciousness and development of ability to memorise

and retain . This is possible only if prana were to interlace the mind intellect and ego. A steady breath leads to enhanced cognitive capacity and one pointed mind . The opposite I.e. a divergent and extravolent mind reduces cognitive faculty and causes irregular limbic movements which lead to extrovert drift and distraction. All these successive limbs of yoga are based on the theory of all pervasiveness of the pranas in the physical and gross realms as we have discussed while expositing the previous two aphorisms . And the present exposition pertaining to the subtler nature I.e. mind ego and reason. pranaic current in the former case conduces to a steady and unswerving seance or posture which in turn leads to steadying of the breath and concentrating the mind . The latter one including pratyahara[withdrawal of senses from their objects] dharana[concentrations] dhyana [meditation] and samadhi[superconsciousness] . Pranas or to be more precise the all pervasive string of prana interlaces all realms of grosser and subtler manifestation so steadying of the current of prana and syncing individual with cosmic realms through the common streamline of the current of pranas has been an essential form of spiritual pursuit even before the evolution the philosophy of yoga . Maheshwara sutras as method of salvation can be decoded to emerge as a full fledged process of spiritual pursuit -each aphorism taken independently a group of interrelated sutras or all the fourteen beats in toto. needless to say that besides merely philosophic exposition these sutras also generate a mind set conducive to the recognition ones essential nature upon being recited or repeated .

Prostration to drums and the drummer or the stick with which the drum is beaten . नमोदुंदुभ्याय च हनन्याय च।
(To be continued ...)

AN APPEAL TO JOIN IN -FOR REPEATING A CANTO FOR UNIVERSAL WELL-BEING

*Maya kundalini. Kriya madhumati. Kali kala malini.
Matangai. Vijaya jaya bhagvati devi shiva shambhavi*

*Shakti shankaravallabha trinayana. Vagvadini. Bhairavi.
Hreemkari. Tripura Parapar mayi. Mata Kumari ityasi ..*

These twenty-four names pertain to the twenty-four elements [tattvas of nature or Prakriti]

In the wake of worldwide corona menace, YTA inspired some aspirants to offer their prayers to the divine mother to pacify the outcome of her wrath by her own benevolence.

[ghramam nijam shamayitum naijayev vristya i.e. to cool down the heat caused by her wrath by her own rain shower]

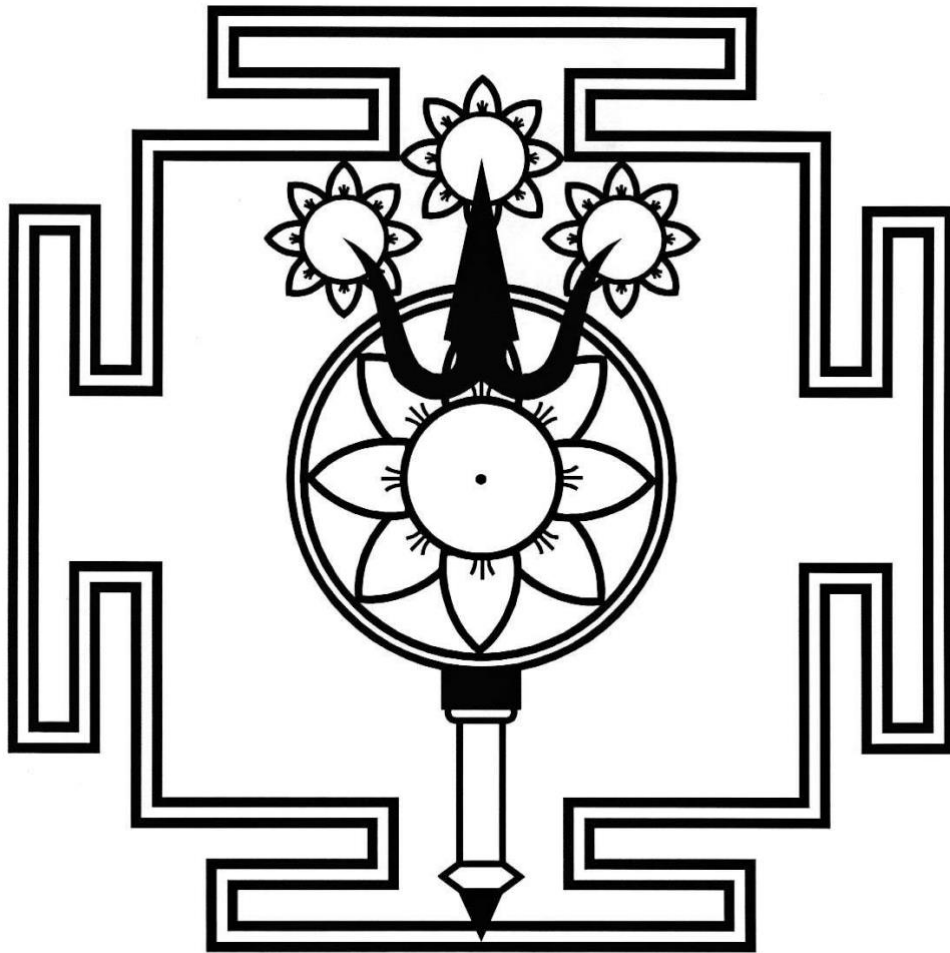

The following devotees contributed their lot of 125000 repetitions of a canto containing 24 names of the Divine Mother.

- Rajeev Gurkha – 40,452
- Ajay Gurkha & Family – 30,118
- Rashneek Kher – 27,595
- Sunil Tiku – 7,384
- Anand Tiku & Mummy – 6,946
- Ajay Koul – 6,698
- Geetika Kher – 5,641
- Naveen Zalpuri – 1,958

Total= 1,26,792

Total Mala =1174

This was during the first week of lockdown. All other volunteers who want to participate can just email us mentioning their names and would-be contribution in terms of repetition [Minimum 3000].
